---

## PROFILE SUMMARY

**Frontend Developer** with nearly **2+ years** of experience building scalable, high-performance web applications using React, TypeScript, and modern UI libraries. Skilled in developing responsive, component-driven interfaces with RESTful API integration. Demonstrates strong problem-solving skills, clean code practices, and Agile team collaboration. Passionate about building user-centric designs with modern frontend frameworks and continuous learning.

---

## TECHNICAL SKILLS

- Frontend Development: ReactJS, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Styled-Components, Material UI (MUI), Joy UI, AG Grid, MUI Data Grid
  - Backend & APIs: RESTful APIs, Axios, Node.js (Basic)
  - State Management & Performance: Context API, Redux, Custom Hooks, Code Splitting, Lazy Loading
  - Libraries & Tools: React Router, React Flow, Chart.js, Bootstrap, ESLint, Prettier, Bitbucket
  - Version Control & CI/CD: Git (Branching, Merging, PRs)
  - UI/UX & Design: Figma, Responsive Design, Accessibility, Web Standards Compliance
- 

## PROFESSIONAL EXPERIENCE

Decode Solutions Private Limited Frontend Developer

Hyderabad | 2023 Jan - Present

- Developed scalable, responsive applications using React, TypeScript, Material UI, and AG Grid.
- Engineered modular, reusable components from UI/UX design prototypes.
- Integrated REST APIs using Axios with robust error handling and data management.
- Enhanced performance via code splitting, lazy loading, and efficient state logic.
- Built complex data tables with advanced filtering, pagination, and custom rendering.
- Collaborated in peer code reviews, maintained Git workflows, and followed Agile delivery.
- Developed interactive user flows using React Flow, ensuring intuitive UX across modules.

## KEY PROJECTS

### ➤ ECME - Admin Dashboard Template

**Tech Stack:** React, TypeScript, Vite, Tailwind CSS, React Router, ESLint, Prettier

- Developed a modern, scalable admin dashboard for project and document management workflows.
- Built reusable UI components and dynamic views with full responsiveness using Tailwind CSS.
- Implemented theme switching (dark/light) and personalized layout configurations.
- Integrated multi-locale and RTL language support to enable global accessibility.
- Used React Router for nested and dynamic routes; applied React Hooks for state management.
- Enforced coding standards using ESLint, Prettier, and maintained scalable folder architecture.
- Enabled seamless REST API integration, making the template backend-ready for multiple use cases.

---

### ➤ E-Commerce Web Application

**Tech Stack:** React.js, Material UI, Styled-Components, AG Grid, MUI Data Grid, Chart.js

- Developed responsive and optimized UI for product listings and customer dashboards.
- Implemented advanced data table functionalities with filtering, sorting, and custom views.
- Utilized Redux and Context API for scalable state management.
- Fetched and displayed real-time product data via Axios.
- Integrated heatmaps and bar charts using Chart.js for sales analytics.
- Used React Flow for visualizing business workflows within the app.
